

GREEN CAMPUS POLICY

- Restrict the entry of automobiles within the campus to ensure pollution free and safe environment.
- Prohibit use of plastic in the campus area.
- Paperless office to save carbon emission in printers. Utilization of ERP softwares and ICT facilitates paperless administration.
- Rainwater is conserved by implementation of percolation pits around the campus.
- The **Enviro club** of our college will be responsible for the green initiatives.
- Proper segregation, disposal and recycling methods to be adopted for the wastes generated in the campus like paper, plastics, e-waste, biodegradable waste from canteen etc.
- To improve sanitation and hygiene, sanitary pad incinerators are recommended to be installed.
- The college will ensure the conversion of biodegradable waste to vermicompost.
- The college will ensure the consumption of low energy by installing LED bulbs.
- Unplug and shut off electrical gadgets when not in use.
- Annual green and energy audit of the campus to be conducted.
